

# Detecting Cancer Early Research Priorities Survey

[www.bit.ly/cancersurveymcr](http://www.bit.ly/cancersurveymcr)  
Twitter: @EarlyPSP

Between December 2018 - February 2019, we asked people...

## What under-researched topics could help us detect cancer sooner?

We heard from over...

## 500 people

Including...

Patients & members  
of the public

Healthcare  
professionals

Friends, family  
& carers

Researchers &  
academics

We now have a list of over

## 1300 Questions

covering research into: cancer testing,  
awareness & investigation of symptoms,  
how the NHS works, and promoting healthier  
lifestyles across the population.

We are now asking you to go  
online and rank each question by  
how important they are to you.

This will help us draw up a  
shortlist of 20-30 of the most  
important research questions.

The shortlist then goes to a  
workshop in September, called a

## Priority Setting Partnership

where a panel of patients, healthcare  
professionals, family and friends will  
carefully discuss each question.

The panel will then produce our final

## Top 10 Unanswered Research Questions

These will be used to inform future cancer research  
and help us detect the disease sooner.
