

# Diabetes & Pregnancy PSP

## Research Priorities in Diabetes and Pregnancy

### A James Lind Alliance Priority Setting Partnership

A James Lind Alliance Priority Setting Partnership has been established by the University of Oxford in partnership with the James Lind Alliance, Diabetes UK, JDRF and DRWF.

The Diabetes and Pregnancy PSP will work to identify the unanswered questions and uncertainties about health care and wellbeing in diabetes and pregnancy from the perspective of women, their support networks (families, partners, friends) and healthcare professionals (HCPs).

Initial survey  
now open

Our aim is to produce a top ten list of priorities that women, their support networks, and HCPs agree are the most important for research to address

Funded by:

SCA/PP/12/19

Diabetes Research & Wellness Foundation

John Fell Fund & Nuffield Department of POPULATION HEALTH Medical Sciences Division
